Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 20 May 2003.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

DETAILED ACTION

Double Patenting

1. Claims 1-18 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over all the claims filed in the following Applications because they are not patentably distinct:

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 7-18 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 7 lines 4 and 5 it is unclear what is being claimed relating to "the sale of convenience store". Perhaps what is meant is "the sale of convenience *store products* and services as claimed in claim 1.

In claim 7 lines 6 and 7 it is unclear what is being claimed relating to "ordering convenience store". Perhaps what is meant is "ordering of convenience *store products* and services as claimed in claim 1.

In claim 13 lines 4 and 5 it is unclear what is being claimed relating to "the sale of convenience store". Perhaps what is meant is "the sale of convenience *store products* and services as claimed in claim 1.

In claim 13 lines 6 and 7 it is unclear what is being claimed relating to "ordering convenience store". Perhaps what is meant is "ordering of convenience *store products* and services as claimed in claim 1.

Claim Rejections - 35 USC § 101

3. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

4. Claims 1-18 are rejected because they lack patentable utility. Claims 1-9 only claim the manipulation of data but perform no concrete, useful or tangible result. This rejection may be overcome by claiming the generation of a report or output of data.

5. Claims 1-16 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter. Current office policy regarding method claims disclosed as requiring a computer but not claiming the use of a computer is to consider the claimed subject matter as non-statutory for failing to fall within the technological arts. Claims must be tied to a technological art. Tying the method to a computer would overcome this rejection.

Claim Rejections - 35 USC § 102

6. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

7. Claims 1-18 are rejected under 35 U.S.C. 102(b) as being anticipate by Noori (Production and Operations Management).

Art Unit: 3627

Noori discloses receiving sales related data from a plurality of convenience store outlets of a supply chain utilizing a network (such as retailers using electronic data interchange among their supply chain); generation of an electronic order form based on the data for ordering from a distributor (such as a purchase order being created relating to an order from a distributor in the supply chain); transmitting the data to a distributor and supplier (sharing of actual point-of-sale information among the supply chain); forecasting activity in the supply chain (the production planning based on actual point-of-sale data is construed to be a different type of forecasting than the "demand forecasts" disclosed).

All other claimed limitations are either disclosed or inherent.

Claim Rejections - 35 USC § 103

8. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

9. In the event Noori (Production and Operations Management) discussed above is found to not inherently teach forecasting activity in the supply chain utilizing actual sales data, claims 1-18 are rejected under 35 U.S.C. 103(a) as being unpatentable over Noori (Production and Operations Management) in view of Examiner's Official Notice.

Art Unit: 3627

Noori discloses the claimed method, system and computer program product for managing a convenience store supply chain utilizing a network but is silent regarding the actual point-of-sale data being used to forecast activity in the supply chain. It is notoriously old and well known in the art of inventory replenishment to use actual point-of-sales data to forecast supply chain activity necessary to replenish the sold goods or services. It would have been obvious to one having ordinary skill in the art at the time the invention was made to provide the method, system and computer program of Noori with the forecasting of supply chain activity of Examiner's Official Notice, in order to replenish sold goods or services.

All other claimed limitations are either disclosed or inherent.
